ABOUT ME

I studied a Vocational Training Diploma in Microcomputer Systems and Networks, where I discovered my interest in technology and the world of computing. Eager to keep learning and deepen my knowledge in this field, I decided to continue my education by pursuing a Higher Vocational Training Diploma in Multiplatform Application Development.

Thanks to these highly enriching educational experiences, I had the opportunity to complete an internship, where I am currently gaining real-world experience in the fields of software development, IT technologies, and cybersecurity.

I consider myself a person who is highly motivated to learn, continue growing professionally, and take on new challenges within the world of development and technology.
